Komazawa University aims to cultivate students who try to introspect, learn new trends in academic studies and practice them in modern society by applying Buddhist Teachings and the Spirit of Zen to today’s education. Komazawa University will make every effort to achieve its purposes as a university by promoting intellectual advancement, while also efficiently making use of the advantages of being located in the center of metropolitan Tokyo.
We are here to provide support so that each of you can lead a full university life.

The Careers Center
The Careers Center makes time to meet with you individually, and provides tailor-made careers advice. The Careers Center provides students with not only support in applying for various qualifications courses, internship programs and joint company information sessions, but also with practical lectures on how to join in group discussions and how to prepare for job interviews.

The International Center
The International Center, established in May, 1988, is the office for the international exchange of students and scholars. The center promotes the internationalization of the University. One of its main activities is to teach Japanese language and culture to international students and to Japanese return students who have lived extensively in foreign countries. The center also provides English language instruction for Komazawa University students.

The Health Care Center
The Health Care Center provides not only first-aid treatment for sudden illness and injury but also medical care and counseling for physical and mental concerns. Whether you have a condition upon entering university or develops a condition after entering university which may affect your studies, you can consult doctors who specialize in internal medicine, surgery, orthopedics, and psychosomatic internal medicine. This center also offers health guidance about first-aid treatment and the prevention of illness.

The Student Counseling Room
It is natural for students to have various concerns and worries during their time at university. Dealing with such concerns and worries one at a time by yourself means you will be strong enough to enter society after graduation. However, it is no good allowing these worries to build up inside so that the situation worsens. At these times, the Student Counseling Room comes into play. Here you can consult our professional counselors, advisors and lawyers in total confidentiality about your concerns no matter how small or big they may be.

The Careers Center
Dormitory
International Exchange House
Komazawa University has a dormitory with 14 private rooms. This accommodation is available only for official exchange students, visiting scholars and researchers. The International Center assigns the rooms to official exchange students as its first priority, and secondly to visiting scholars and researchers.

Sports Association
The members of the Sports Association are the stars who take part in official matches to uphold the honour of the University and the club. All groups which are members of the Komazawa University Sports Association are affiliated members of the various sports federations. If you have the motivation, even complete beginners can become active members.

Cultural and Arts Clubs
These groups were established before 1972 and have a long tradition. You can really make the most of your time at university by joining one of these cultural, arts, study or performance clubs, where you will be able to make new friends and meet new challenges.

The Department offers courses in various fields of Buddhism, ranging from China to Japan, from the earliest days of Zen Buddhism to the present, and from its teachings and philosophy to its arts. The Department also equips students with a general knowledge of the Soto sect of Zen Buddhism from Master Dogen and Master Keizan to the present.

In your first and second years you will learn languages such as the classical Chinese necessary for researching literature on Buddhism and will acquire a broad fundamental knowledge of Buddhism.

In your third and fourth years you will choose a field of interest from the wide range of courses available and study this field in Seminar I and Seminar II. You will be able to take special subjects provided in the Department of Buddhist Studies according to your interests.
Department of Japanese Literature

The Department offers courses in Japanese language and literature, from classical literature (e.g., Manyoshu, the Tale of Genji, and Heike Monogatari) to contemporary literature (e.g., works of Soseki Natsume, Haruki Murakami, Shuntaro Tanikawa). The Department also provides various courses such as courses in Media, on Child literature, and on Performance.

In your first year, you will learn about Japanese language and literature and the methods for studying it.

In your second year, you will be able to practice using logical thinking through debates and presentations and will be able to study in a wide range of specialized courses.

In your third year, you will be able to join a seminar class in which you can further develop your knowledge and research skills. You will also be able to take a variety of specialized courses.

In your fourth year, you will write your thesis.

Department of English and American Literature

The Department provides English courses to strengthen students’ English proficiency and courses on English and American literature, poetry, theatrical performance, film and arts culture, and history. The Department also offers courses on English linguistics ranging from the history of English to variation in English.

In your first and second years, you will develop practical English language skills through the course, “Speech and Communication.” You will also acquire the knowledge and reading skills needed to appreciate English literature through the “English Exercise” and “Literature Reading” courses.

In your third year, you can choose from a variety of elective courses based on your own individual interests. You will also take a small-group seminar course to acquire more advanced knowledge and to hone your research skills.

In your fourth year, you will write a thesis through the support of tutorials.

Faculty of Letters

Read the human mind, study humankind.
Department of Geography
Cultural Study Program

The Department offers courses and opportunities to do field work which help develop your skills for observing and investigating life in cities and in farming and mountain villages from a geographical perspective. The Department also provides courses which equip you with the skills needed to research the essence of regional culture in Japan and other countries in a comprehensive manner.

In your first year you will learn about the basics of geography and will develop analytical skills in introductory and practical courses.

In your second year you can choose from a variety of specialized subjects according to your own individual interests.

In your third year you will learn research skills in field work in elective courses.

In your fourth year you will write a thesis based on the knowledge you have acquired in courses and while doing field work.

Environmental Study Program

In this Major you can study courses concerning the relationships between the regional environment and human beings, in terms of climate, geography and water circulation.

In your first year you will learn about the basics of geography and will develop analytical skills in introductory and practical courses.

In your second year you can choose from a variety of specialized subjects according to your own individual interests.

In your third year you will learn research skills in field work in elective courses.

In your fourth year you will write a thesis based on the knowledge you have acquired in courses and while doing field work.

Department of History
Japanese History Program

The Department offers practical courses in which students learn how to conduct historical document research and decipherment, theory construction and proof, and how to present their research results. The Department also provides chances to practice historical research in the field through courses such as the one leading to the qualifications necessary to be a curator.

In your first year you will learn the basics of Japanese history and basic skills in historical research.

In your second and third years you will choose from a variety of specialized subjects on different periods and fields according to your own individual interests. “Studies in Historical Materials I to IV” are very important courses for acquiring the skills for empirical research.

In your third and fourth years you will learn how to interpret historical materials in the “Seminar on Studies in Japanese History I and II.” In the fourth year you will write a thesis based on the knowledge you have acquired in the courses.

Foreign History Program

In this section of the Department you will be able to develop your knowledge and skills through a variety of lectures and lessons which will help you acquire insight into current situations in the world from the perspective of history.

In your first year you will learn basic skills such as how to use the Library and how to write papers, while studying an outline of world history. You will also develop your understanding of historical science methodology.

In your second year you will gain knowledge about history and methodology while studying oriental and occidental history. You will learn basic skills for dealing with literary and historical documents.

In your third year you will learn about the latest research on history. You will conduct research into the literature and on historical documents and will report the results.

In your fourth year you will write a thesis based on your research results.

Archaeology Program

In this section of the Department you will have the opportunity to participate in archaeological digs in China as well as in Japan. This major also provides practical courses on photographic techniques, survey work, and antiquities measurement in order to develop students’ skills for participating in archaeological digs.

In your first year you will learn about the basics of archaeology and acquire abilities to interpret archaeology from a broad perspective.

In your second year you will learn the basic skills and practical methodologies you will need on archaeological digs through practical courses.

In your third year you will experience archaeological digs overseas as well as in Japan, and will further develop your understanding of practical research methods on site.

In your fourth year you will write a thesis testing your own hypothesis by collecting, analyzing and interpreting archaeological materials.
Department of Sociology

Sociology Program

This section of the Department systematically offers courses from basic to advanced levels. Students can learn about social systems in a systematic way, discover their interests through study, and acquire the knowledge and flexible skills required in today’s society.

In your first year you will learn the basics of Sociology, develop computer skills and study methods in social research.

In your second year you will learn how to read and write reports and how to make presentations in seminars. You will also be able to take lecture courses in a variety of fields.

In your third year you will be able to take a seminar class and learn more about research in Sociology. You will also conduct a collaborative research project.

In your fourth year you will write a thesis based on your own interests under the supervision of your seminar instructor.

Social Work Program

You will receive a step-by-step career education through the courses in this major. Courses on counselling and client support are provided for those who want to be professionals in the social welfare field.

In your first year you will learn the basics of Social Welfare, develop computer skills and study methods in social research. You will develop a firmer image of the direction you wish to take in your future career.

In your second and third years you will be able to choose lectures and courses based on your own interests. You will gain more advanced knowledge and skills and will be able to put these to the test in practical training classes provided by the Social Welfare specialist courses. You will also learn about living as a member of society in the career training classes provided in the Social Welfare basic course. In seminar classes you will develop your problem-solving abilities.

In your fourth year you will write a thesis and learn special social welfare skills in the training course for mental health care.

Department of Psychology

The three main features of the Department curriculum are “an emphasis on fundamental education,” “provision of a wide variety of subjects” and “making use of the most up-to-date information.”

In your first year you will learn about the basics of psychology through introductory courses and special lectures.

In your second year you will learn about various fields in psychology from both theoretical and practical perspectives. You will also learn about scientific approaches and methods in psychology.

In your third year you will learn from a new range of topics more about psychology and related areas.

In your fourth year you will study a topic which interests you and write a thesis.
Department of Economics

After receiving an extensive grounding in general economics in general, you will begin to create theoretical models of your own and conduct statistical analyses of data. The courses provided are designed to meet the future needs of students in their chosen field or career and ensure that students systematically learn about their specialization.

In your first year you will gain basic study skills through the Foundation Seminar, receive a broad, basic education through the University Common Courses, and will build the foundations you will need in your specialist field.

In your second year you will deepen your specialist knowledge in small seminar classes and will systematically take specialist subjects in your chosen field.

In your third year you will be able to gain a wider understanding of economics by taking courses in the Departments of Commerce and Contemporary Applied Economics.

In your fourth year you will be able to bring everything you have learned together in a graduation thesis which you complete under the course “Graduation Research” and which you take alongside your seminar class.

Department of Commerce

By thinking about how contemporary society should relate to markets and to the companies at their center, you will begin to acquire the ability to think theoretically and practically for yourself. The Department of Commerce offers courses specifically designed to help you decide on a career path and you will have opportunities to hear about the latest business trends from lecturers who are currently working in companies.

In your first year you will learn how today’s companies operate in the market covering basic areas such as distribution and information, accounting and management, and finance and trade.

In your second year you will build on your basic knowledge of commerce and will develop the ability to think about society as you begin to gain a more specialized understanding.

In your third year you will become more deeply engaged with commerce as you explore your own interests and you will start to try to uncover problems which contemporary companies face.

In your fourth year you will spend more time investigating the problems you have identified and will consolidate your own ideas regarding the ways in which contemporary society relates to the markets.

Department of Contemporary Applied Economics

In our Department you will learn how to view rapidly changing current economic phenomena from both a macro and micro perspective through our comprehensive curriculum which will allow you to grasp new economic trends. You will have the opportunity to learn about cutting-edge areas such as game theory as well as classic economic theory and economics as a system and its relationship with law. The Department also offers courses which look at a variety of organizations which support community economics. These courses focus on the management of such organizations. The curriculum is designed to allow you to choose from a wide selection of courses.

In your first year you will learn techniques for acquiring many types of knowledge which you will encounter at university while at the same time taking liberal arts courses and learning about the fundamentals of economics.

In your second year you will deepen your understanding and gain greater expertise by taking courses outside the basic core and by joining seminar classes.

In your third year, based on a firm understanding of the essentials of commerce, you will further develop your expertise and your ability to think about society.

In your fourth year you will look carefully at the problems you have identified for yourself and will begin to form your own ideas and opinions about contemporary society and how it relates to the market.
Faculty of Law

Department of Law

In order to respond to complex contemporary legal issues, this Department provides special courses in environmental law, intellectual property law, and consumer law. Students cultivate a practical sense of the law through courses given by law practitioners (e.g., lawyers, public servants, and tax accountants), who are actively engaged in legal work in the community. In your first year you study foundational courses such as Constitutional Law, Civil Law, and Criminal Law. From the second year you can register for applied and advanced courses in Commercial Law, Civil Procedure Law, and Criminal Procedure Law.

Department of Political Science

Beginning with a course called “Contemporary Society and Politics” which allows you to learn how core politics drives society, this Department provides courses which deal with priority areas in society such as “International and Area Studies,” “Politics and Media Studies” and “Government and Public Policy.” In seminar classes you will have the opportunity to study with teachers who may expect you to do field research, engage in debates, or visit parliament or courts. In the Centre for Research in Mass Communications, you will be able to study how newspapers are put together and presented. In your first year you study how society functions and ways of thinking about it mainly through introductory courses on politics and public administration. In your second year you choose courses for yourself which fit your future goals and study to acquire the knowledge and methods which form the basic content of each course. In your third and fourth years you study advanced courses which introduce a practical and professional element. You can also take relevant courses in other Faculties and Departments which will stretch you further. And in seminar classes you will apply the knowledge you have gained by carrying out your own research projects and surveys.

Why not join us in trying to understand the fabric of contemporary society?
This Department aims to foster “professional managers” who can think independently and take action in response to sudden changes in contemporary society. The Department places an emphasis not only on a variety of specialized courses but also on discussion and group work in seminar courses so that students can acquire the problem-solving skills which are required of today’s business managers.

In your first year you will acquire the knowledge and ideas which will act as a foundation for the next stage of your studies through courses such as Corporate Management, Economic Analysis, Corporate Accounting, and Corporate Bookkeeping.

In your second, third and fourth years of study you will be able to choose from over fifty specialized courses according to your own interests and you will be able to register for seminar courses with small class sizes.

Department of Marketing Management

In this Department you will have opportunities to learn strategies for making full use of corporate management resources (people, goods, money, and information) so as to meet customers’ needs or to create markets in an unrivaled way in collaboration with outside partners. The Faculty places an emphasis on small-group education so as to develop your individual ability and the ability to work in teams and provides freshman seminars and seminars for second year to fourth year students.

In your first and second years you will take courses which are essential for becoming marketing experts who are well-versed in management skills. The systematic approach allows you to gradually acquire these skills in both basic and practical courses.

In your third and fourth years you will engage in lots of discussion with expert instructors and other seminar members so that you develop an ability to explain your own original ideas logically.

Why not join us to learn how companies which produce goods which everyone wants really work?

Faculty of Business Administration
Department of Radiological Sciences

In our Department you will gain the knowledge and skills in radiological science which are needed to become a medical specialist at the same time as taking a wide range of liberal arts subjects. The curriculum offered at Komazawa is unique in providing both courses which focus on techniques in medical treatment and courses which focus on imaging techniques.

In your first year you will study subjects to do with the foundations of medicine, science and engineering such as anatomy, radiological physics and electrical engineering, as well as having the opportunity to take a wide range of liberal arts subjects.

In your second year you will study subjects such as clinical medicine, imaging technology, and radiation technology, which are necessary for the actual application of radiological sciences in a medical setting.

In your third year you will study more advanced and practical subjects according to the course. We cover all the subjects which are needed for the national examination.

In your fourth year the number of elective courses increases and you can register for courses which suit your own interests. You can also concentrate on your graduation research project and can prepare for the national examination.

Faculty of Health Sciences

Why not become a member of a medical team who can help to protect people’s lives?
Department of Global Media

To help nurture talented people who can operate in the rapidly developing global society, this Department offers courses which allow you to develop your communication abilities both in English and in terms of media and IT literacy. This Department also offers interdisciplinary courses in economics, business administration, sociology, international cultural studies, law, communication, and information science, which are designed to help you understand the true nature of media and of the content they carry.

In your first year you will learn about information literacy and media literacy taught by IT and media specialists and you will be taught practical English by native English instructors.

From your second year you will have the opportunity to gain overseas experience through long-term and short-term study abroad programs and through overseas internships which will help you acquire the ability to operate on the global stage.

In your third year you will be able to choose an area from a range of interdisciplinary courses which fit your own interests and you will be able to deepen your knowledge of this area by participating in a seminar class taught by someone who specializes in this field.

In your fourth year you will enhance your chances of finding a job by learning about what is happening in industry through taking classes taught jointly by full-time lecturers and people actually working in business.

Faculty of Global Media Studies

Uncover the true essence of the information which flows through global networks, understand the role of the various media which convey this information, and equip yourself with a fully communicative ability in English.
Postgraduate Programs

You can deepen the understanding you gained during your undergraduate degree at Graduate Schools which carry out high level research from a broad range of perspectives. Currently, there are two-year Masters courses and three-year Doctoral courses in fourteen majors in seven Graduate Schools at Komazawa, excluding the Law School. The research output attracts considerable attention in each field and we aim to produce graduates who can perform in a wide range of areas.

Research Centers and Laboratory

For students aiming high, we provide an environment for specialist research in the form of Research Centers and a Laboratory.

There are currently eight Research Centers and one “Laboratory” established at Komazawa University where high-level, specialist research is carried out in such areas as Law, Accounting, and Mass Communications. These Centers also help you in achieving your future goals by supporting you in gaining qualifications and in your post-graduation career path.

- The Institute of Legal Research
- The Research Institute for Accounting
- The Institute of Zen Buddhism and Economics
- The Institute of Mass Communication
- The Institute for Applied Geography
- The Zen Institute
- The Institute for Comparative Buddhist Literature
- The Research Institute for Justice
- Komazawa University Global Media Studies Laboratory
Admission for International Students

Undergraduate Programs

The University of Tokyo accepts all applications from students for the undergraduate program. All undergraduate programs are four years in length.

Applicants must satisfy each of the following requirements:

1. The applicants must take the Examination for Japanese University Admission for International Students (JUATS) and receive a pass.
2. The applicants must meet the minimum requirements specified by the University of Tokyo for their chosen program.
3. The applicants must have completed 16 years of education abroad, with the exception of the Division of Global Media Studies, which requires completion of 18 years of education.
4. The applicants must submit the required application form to the Admission Center, the University of Tokyo, by the specified deadline.
5. The applicants must take a written examination and interview in Japanese. The examination subjects are different for each major.

Application Procedure

1. The applicants must submit the required application form to the Admission Center, the University of Tokyo, by the specified deadline.
2. The applicants must take a written examination and interview in Japanese. The examination subjects are different for each major.
3. The applicants must submit the required application form to the Admission Center, the University of Tokyo, by the specified deadline.
4. The applicants must take a written examination and interview in Japanese. The examination subjects are different for each major.

Entrance Examination

The applicants must take the Examination for Japanese University Admission for International Students (JUATS) and receive a pass.

Eligibility for Admission

The applicants who have been approved by the Ministry of Education, Culture, Science, and Technology in Japan must satisfy each of the following requirements:

1. The applicants must have completed 16 years of education abroad.
2. The applicants must have been admitted to a foreign university or college.
3. The applicants must be non-Japanese citizens.

Postgraduate Programs

Applicants must satisfy each of the following requirements:

1. The applicants must have completed a bachelor’s degree or a master’s degree.
2. The applicants must have completed a master’s degree.
3. The applicants must have completed a master’s degree or a doctoral degree.
4. The applicants must have completed a master’s degree or a doctoral degree.

Eligibility for Admission

The applicants who have been approved by the Ministry of Education, Culture, Science, and Technology in Japan must satisfy each of the following requirements:

1. The applicants must have completed a bachelor’s degree or a master’s degree.
2. The applicants must have completed a master’s degree.

3. The applicants must have completed a master’s degree or a doctoral degree.
4. The applicants must have completed a master’s degree or a doctoral degree.
Scholarships

Komazawa University supports international students with financial difficulties through internal and external scholarship programs. All the university scholarships for international students are provided for free.

The university website provides you with information such as the date of distribution of application forms, and when the scholarship organizations put out a call for applications.

Please check the requirements for applicants for each scholarship program on the scholarship bulletin board and the university website.

In principle, you cannot apply for other full scholarships or grants apart from those we offer.

International students (first year students) applying for these scholarships are required to take the Examination for Japanese University Admission for International Students (EJU) beforehand.
