

## Assembly line in Ford Motor Company, in the early of 20<sup>th</sup> century

Henry Ford initiated a new era in industrial history in 1913 when he established the moving assembly line at the Ford plant in Highland Park, Michigan. The men below are working on the first flywheel magneto assembly line.

Fly wheel magneto assembly line, circa 1913  
(A History of Ford Motor Company, 1992, p.20.)

An outdoor line for the Model T, circa 1914. The carbody is dropped from a ramp on to the chassis. (A History of Ford Motor Company, 1992, p.24.)

The Highland Park facilities of the Ford Motor Company in 1927.  
(A History of Ford Motor Company, 1992, p.28-29. )
